#### Living and Learning Globally

How do we build school communities that develop the knowledge and competencies that are essential for living and learning in a globally connected world? Global engagement represents a commitment to address humanity's greatest challenges in the classroom and beyond.

- Discover key concepts for the design and implementation of learning engagements that support international mindedness.
- Explore how global issues and contexts expand and enhance perspectives and engage students in meaningful ways.
- Embed global contexts into the written, taught and learned curriculum to provide opportunities for students to participate in a complex, dynamic and diverse society that is connected due to greater mobility and technology

All educators, IB coordinators and school leaders or decision-makers at any point in their journey as life-long learners are invited. You will engage in provocative learning experiences around challenging ideas central to the IB's mission to make the world a better place through education.
